B. Create examples of the use of **branches** and in your code. Be sure your code identifies the following fundamental statements: if, elif, and else statements.

Rubric

Guidelines for Submission: This is a draft of part of the final project. Complete the steps in Codio, then export and comment on the completed script. Once completed, submit the document with your commented code to Brightspace. Feedback will be provided by your instructor to incorporate in the final submission and the reflection document.

Critical Elements	Proficient (100%)	Needs Improvement (75%)	Not Evident (0%)	Value
Variables	Creates three uses and fundamental types of variables in code	Creates variables in code, but uses are inappropriate or inaccurate	Does not create three uses and fundamental types of variables in code	45
Branches	Creates three uses and fundamental types of branches in code	Creates branches in the code, but uses are inappropriate or inaccurate	Does not create three uses and fundamental types of branches in code	45
Script Comments	Code comments explain and facilitate navigation of the code	Comments provide little assistance with understanding the code	Code is not fully annotated, or comments do not explain the code or do not facilitate navigation of your code	10
			Total	**100%**
